Why Should I Join?

As an HRWA Associate Member you will play a vital role in HRWA's future success. Your membership will support important training, technical assistance and legislative programs that benefit rural and small community water and wastewater systems. As a Corporate Partner, your company supports our expanding organization, build industry-wide recognition for your firm, and permits HRWA to offer more services to the water and wastewater specialists and systems in the Hawai'i and Western Pacific Territories. It is very important that the Industry Systems have access to Industry Providers, like yourself, as a means to improve and maintain developing regulations, management strategies, and technologies. As an Associate Member, one of the biggest benefits is our commitment to facilitate positive networking between our Members. With HRWA's extensive reach here in Hawai'i and the Pacific, we want to also support those who support us! Your participation and support of our Rural Water Initiatives will help improve system operations for the water and wastewater systems throughout Hawai'i and the southern and western Pacific regions. This will improve the quality of the drinking water and ensure properly treated wastewater for today and future generations.

Associate Membership Application
