HRWA Board Voting

Why Should I Join?

Water and wastewater utilities face continuous changes. It is very important that these service providers stay informed of developing regulations, management strategies, and technologies. Water and wastewater specialist as well as decision makers must continue to train to deal with these changes.

Hawai'i Rural Water Association offers numerous services and educational opportunities to help make this possible. Rural Water is the advocate for rural and small system issues in the regulatory process with representation in the Halls of Congress for our industry. We welcome water and wastewater utilities, as well as management companies serving them, and interested individuals, to join our association.

Mahalo,
