

120Water and Hawai'i Rural Water Association Announce New Partnership

Collaboration Will Equip Water Systems Across Hawai'i with Resources and Tools to Comply with Lead and Copper Rule Revisions (LCRR)

ZIONSVILLE, IN & WAIKOLOA VILLAGE, HI (FEBRUARY 17, 2022) – 120Water and the Hawai'i Rural Water Association (HRWA) announced a new partnership that will expand the technical assistance and support available to HRWA members, with a focus on equipping systems with tools and resources to successfully manage water quality programs related to lead and other contaminants. The partnership will also increase the resources available to water systems as they prepare to meet new regulatory expectations due to the U.S. Environmental Protection Agency's Lead and Copper Rule Revisions (LCRR).

"I'm excited about this partnership between HRWA and 120Water as it will provide our water utilities and their customers with another solution to meet the new requirements under the LCRR. Juanita Reyher-Colon, Executive Director"

As the leading end-to-end solution for managing critical lead and drinking water programs, 120Water enables local and state governments, water systems and facilities to manage water quality and prioritize investments that protect public health. The 120Water solution -- which will be available with preferred pricing to HRWA members -- automates actions needed to meet compliance requirements, such as LCR, and ensures timely and transparent communication with stakeholders and the public.

"With potential infrastructure funding and LCR revisions on the horizon, this is a timely partnership to help HRWA members get ahead of the curve," said Lowell Huffman, Director of Partnership at 120Water. "Providing water professionals with the tools to efficiently operate water quality programs will not only help them meet compliance and access funding opportunities, but to safeguard water quality and protect public health."

Hawai'i water systems interested in learning more about this partnership, preferred pricing, and the resources available to them may contact Juanita Reyher-Colon- juanita@hawaiiirwa.org or 808.315.8925.

Rural water associations interested in learning more about similar partnerships may contact 120Water's Association Partnerships Manager, [Jeff Biberdorf](#).

ABOUT 120WATER

120Water is the end-to-end solution used by water professionals across the country to manage critical lead and drinking water programs. Comprised of secure cloud-based software, services and point of use kits, 120Water's solution provides tailored workflows for complying with lead and water quality programs that protect public health. Their team of water, policy and technology experts have supported

over 7,000 sampling events across the country, partnering with water systems and government agencies such as Citizens Energy Group, the City of Providence, the City of Asheville, and Chicago Public Schools to protect public health and provide clean drinking water to all communities. ABOUT THE Hawai'i Rural Water Association

Rural water initiatives began back in 1976 as a result of the Safe Drinking Water Act; enacted and enforced by the EPA in 1974. Rural water initiatives focus on providing grassroots training and technical assistance for all rural water and wastewater communities nationwide to meet and maintain compliance of the Act. The Hawai'i Rural Water Association (HRWA), a state affiliate of the National Rural Water Association (NRWA), is a 501c(3) nonprofit organization that maintains the rural water initiatives at a local level in the State of Hawai'i and the Pacific American Territories. The HRWA formally organized in December of 2010 and provides training and technical assistance for rural water & wastewater community systems largely through its federally funded programs: USDA RD, FSA, and EPA. All programs are a free service to Hawai'i's rural utility systems to utilize and ensure quality and safe drinking water. Our mission is to provide superior support and quality training to our rural water and wastewater communities and do so with Accountability, Integrity, Leadership, Quality, and Trust.
